

FUZHOU

China

General View

DESCRIPTION

This project is to construct a coal-fired thermal power station with two 350MW units in Fuzhou City, Peoples Republic of China. It is to use coal from the Shan Xi Province located in the Ma Wei Special Economic Zone, Fujian Province.

NAME OF CLIENT:

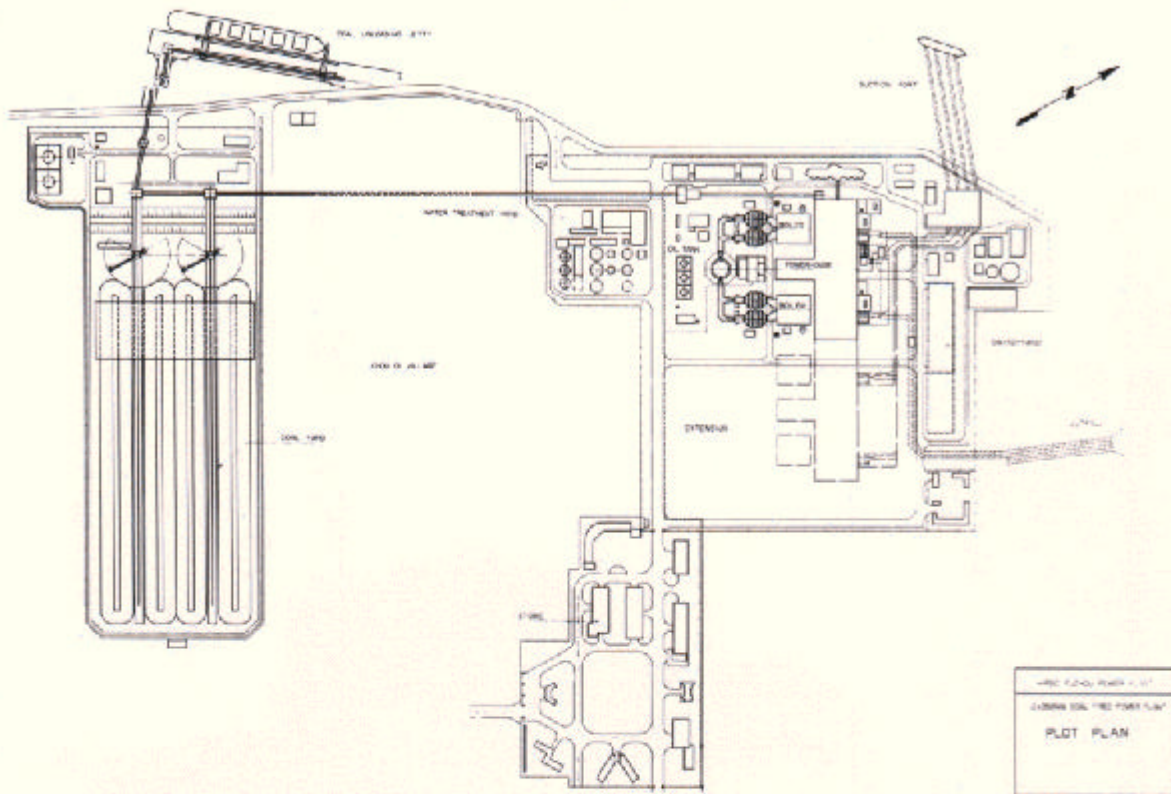

Huameng International Power Development Corporation (HIPDC)

CAPACITY: 2x350MW

SERVICES:

Construction Supervision (December,1986-December,1987)

General Plot Plan

Berth

Main Equipment

Boiler	Single Drum, Radiant, Reheat Forced Circulation, Outdoor Type (1,150 t/h)
Turbine	Tandem Compound, Two Cylinder Double Flow, Exhaust Reheat Condensing Turbine (350 MW)
Generator	350 MW
Berth	10,000 D.W.T
Coal Storage Yard	250,000 ton
Power Station Area	300,000 m ²
