

ONIKOHBE GEOHERMAL

Japan

General View of Power Plant

DESCRIPTION

This project was proposed to make full use of untapped energy sources in Japan which depends mostly on imports for its primary energy.

Therefore, the development of indigenous geothermal energy sources is of deep significance to Japan. Although small in scale, this Power Plant is contributing to the reduction of dependency on oil

NAME OF CLIENT:

Electric Power Development Co., Ltd.(EPDC)

CAPACITY: 12.5MW

SERVICES:

Feasibility Study

Detailed Design

Construction Supervision (September, 1973 -
March, 1975)

Operation and Maintenance (March, 1975 -)

EPDC
