

# SAKUMA

Japan

General View of Sakuma Dam

## DESCRIPTION

The Sakuma Power Plant, completed in 1956, produces 1,750GWh of energy annually with an installed

Located near to the border between 50Hz and 60Hz zones, all the four turbine generators can operate in both frequency. Part of the water stored in the reservoir is conducted to irrigate farmlands downstream.

## NAME OF CLIENT:

Electric Power Development Co., Ltd. (EPDC)

## CAPACITY: 350MW

## SERVICES:

Feasibility Study (September, 1952-March, 1953)

Detailed Design (September, 1952-March, 1953)

Construction Supervision (April, 1953-September, 1956)
