

# TAKEHARA

Japan

## DESCRIPTION

The No.1 unit of this power station was completed in July 1967 as a first attempt in Japan to burn coal from various mines in Japan. The oil fired No.2 unit was built in a period of 24 months, from the

commencement of foundation works until commercial operation, to catch up with the rapidly growing power demand in those years. The No.3 unit, designed to burn imported coal became operational in March 1983 bringing the total installed capacity

## NAME OF CLIENT:

Electric Power Development Co., Ltd. (EPDC)

**CAPACITY:** Unit No.1 250MW, No.2 350MW, No.3 700MW

## SERVICES:

Design

Construction Supervision

Operation and Maintenance (From Unit No.1

July, 1967, No.2 June, 1974, No.3 March, 1983)

Replace Unit No.2 FBC Construction (June, 1992 - June, 1995)

FBC Operation and Maintenance (June, 1995 - )

**EPDC**
