

# BANIAS

Syrian Arab Republic

General View

## DESCRIPTION

The Government of Japan has to execute the Grant for the rehabilitation of Baniyas Thermal Power Station and JICA has been designated by the Government of Japan as the organization responsible for necessary works aiming at expediting the power execution of the Grant Aid.

EPDC executed a full design service to the project consisting of the feasibility study, preparation of all equipment and construction tender documents, necessary parts of modification and the supervision of all the work at contractor shipyard and at site. The supervision work also included the attendance at shop tests for all the equipment and the overseeing of the commissioning tests.
